

## Recorded Online Worship Attendance

1. No registration/sign in is required. Worshipper does not need to fill in their name or contact information in order to be counted as attending an online recorded or live streaming worship service.
2. To be counted in the online worship attendance numbers, a worship attendee must participate in at least 50% of the full livestreamed or recorded worship service or 80% of a partially livestreamed or recorded worship service.
3. In order to count multiple attendees at the same IP address, an actual count of how many are participating in the online livestream or recorded worship service must be indicated when signing in to the worship service. Otherwise, every IP address is counted as one person participating in the online worship service. There is no multiplier allowed.
4. The only numbers included in the EVC online worship attendance or the Statistical Tables is the number of persons in an actual online livestreamed or recorded worship service (not podcasts or other forms of online presence).
5. The cutoff day for counting the prior weekend online livestreamed or recorded worship services is Tuesday.
6. All attendance numbers for online livestreamed or recorded worship service must meet all the above criteria.
